Recent Projects

Gujarat Electricity Regulatory Commission
Role: Software Developer
Duration: 3 months
Skills & Tools: JavaScript, Ajax, HTML5, CSS3, PHP, WordPress, MySQL
Details: This is a fully dynamic website which has the features to update all the information through dashboard without any custom coding. The interesting part in this is the hearing schedule where visitors can select highlighted dates(basically it presents there is a hearing on this date) and view all hearing available on this date. It also has a feature of access management/user management. Payment gateway also integrated with this to get online payment from visitors.

Link: https://www.gercin.org/

NORTH EASTERN REGIONAL LOAD DESPATCH CENTRE
Role: Software Developer
Duration: 4 months
Skills & Tools: JavaScript, Ajax, HTML5, CSS3, PHP, WordPress, MySQL
Details: This is a fully dynamic website which has the features to update all the information through dashboard

without any custom coding. It has a feature to view reports by selecting date in daily reports, week in weekly reports, and year in yearly reports, real time SACADA data also showing on the homepage of the website which is updated every minute. It also has a feature of access management/user management. It is also a multilingual website.

Link: https://www.nerldc.in/

Central Electricity Authority
Role: Software Developer
Duration: 6 months
Skills & Tools: JavaScript, Ajax, HTML5, CSS3, PHP, WordPress, MySQL
Details: This is a fully dynamic website which has the features to update all the information through dashboard without any custom coding. It has a feature to view reports by selecting date in daily reports, week in weekly reports, and year in yearly reports. APIs have also been created for this website to dump data from other reports of portals and then show these in graphical form which can be seen on the dashboard page of the website. It also has a feature of access management/user management. It is also a multilingual website.
